***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, drawn to an identification tag, classified in class 40, subclass 665.
- II. Claims 10-16, drawn to a method of making a tag, classified in class 29, subclass 428.

The inventions are distinct, each from the other because of the following reasons:

Inventions I. and II. are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as providing a heat shrinkable material, adhering one end of a flexible cord to the heat shrinkable material, adhesively attaching a label having indicia to the heat shrinkable material, attaching the second end of the flexible cord to an object.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Charles B. Lobsenz on Feb. 8, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3611

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
